

GADPro - Greenwich Summer of DANS 2019

Monday 10 June – Friday 14 June

The **Greenwich Summer of DANS 2019** is a summer school on data and network science organised at the University of Greenwich, London.

A team of international lecturers and experts with academic and industrial experience to friendly guide you through fundamental aspects of data and network science with applications to social media, social contagion and business analytics.

The school will have a mix of theory, specialised seminars and computer labs, plus allocated time to develop a team project to be presented at the end of the school.

The school is not only about data and network science methods but a full learning experience to develop creativity, teamwork and most of all, to have fun.

The expected audience are Master/PhD students, researchers and professionals interested on data and network science who are comfortable with some math and computer programming.
