Call for proposals

Dear GBS Colleague

This year, our annual Learning and Teaching Festival will take place on campus on **Thursday 20th June 2024**. We are inviting colleagues in Greenwich Business School and its partners to share pedagogic research findings and inspiring practices in learning and teaching under this year's theme of **The Big Picture: Meta-learning**.

“Meta-learning refers to the process of learning how to learn.”

With the rapid advancement of technology and the ever-changing landscape of knowledge and skills required in the workforce, meta-learning becomes increasingly important.

Universities are likely to emphasize not only the acquisition of specific knowledge but also the development of meta-cognitive skills such as critical thinking, problem-solving, adaptability, and self-directed learning. Meta-learning involves understanding one's learning process, identifying effective learning strategies, and continuously refining and improving one's learning approach.

By focusing on meta-learning, universities can empower students to become lifelong learners who are equipped to navigate complex challenges, embrace continuous skill development, and thrive in a rapidly changing world. Additionally, meta-learning aligns with broader educational goals such as fostering creativity, resilience, and a growth mindset, making it a relevant and impactful concept in higher education.
