

Workshop Packages: Subject Specific

Outreach & Educational Partnerships Team

outreach@gre.ac.uk

These packages have been designed to help students of certain subjects identify skills and techniques which will help them in their chosen career.

We can also organise for a member of your chosen faculty to visit your school/college to run a subject specific taster session, if their schedule permits, or personally invite you and your students to an on-campus taster day.

We currently offer **6** Subject Specific Packages:

- 1.) Business**
- 2.) Education**
- 3.) Engineering & Science**
- 4.) Health & Human Sciences**
- 5.) Humanities**
- 6.) Liberal Arts & Design**

Please note:

- All sessions are 1 hour in length, with a 45-minute presentation and 15 minutes Q&A.
- These workshops can be delivered online or in-person.
- All workshops are **completely free**.
- We register for events using a QR code, so it would be handy if students were permitted to use their phones at the start of the session.

Business

Title	Content
Teamworking & Networking	<p>This interactive workshop is designed to help students develop their confidence when working in groups, as well as speaking to new people. Filled with collaborative activities, this session gives students an insight into the importance of developing professional relationships.</p>
Leadership	<p>Students will identify what leadership means and understand the importance in not just academia, but also in day-to-day life skills. The importance and need to develop self-awareness and evaluate own leadership style will be included too.</p>
Critical Thinking	<p>Students will be able to identify and describe what critical thinking is, understand the importance of it and develop these essential skills with various activities to be able to use these in any examples.</p>

Education

Title	Content
Active Listening & Communication	Students will explore the importance of these key skills used in everyday life and learn techniques to improve these through various activities.
Managing Stress	Students will identify potential causes of stress (before/present/future), describe some of the effects of too much stress and use strategies and support networks to manage stress.
Education Interview Skills	For students who are interested in applying to and studying an education or teaching course at university. This session covers the education interview process at the University of Greenwich and details the key elements students need to know before, during and after an education interview, including some mock interview practice.

Engineering & Science

Title	Content
Independent Learning	Students will be able to identify their learning style, explain the importance of effective note taking and tools which can be utilised and the benefits of good time management skills.
Problem Solving	Students will learn to accurately assess a situation and arrive at a positive solution using a model that can be applied to solve any problem with engineering as an example.
Attention to detail	Understanding the importance of attention to detail and ways to improve this core skill.

/

Health & Human Sciences

Title	Content
Time Management	Students will explore the importance of time management and complete various activities, with some tips and tricks on how to strengthen this skill.
Opportunities for Careers in Healthcare - Exploring your Options	This session will allow students to explore the courses and pathways available to them if they are looking to enter a career within the healthcare field. With information on how to research successfully, placement opportunities and funding support.
Health Interview Skills	For students who are interested in applying to and studying a health course at university, such as Nursing. This session covers the health interview process at the University of Greenwich and details the key elements students need to know before, during and after a health interview, including some mock interview practice.

Humanities

Title	Content
Choosing your Question	Covers motivations for completing a research project or an academic piece of writing. Students will have an opportunity to select a research topic of their choice (if applicable) and evaluate a potential research question by the end of the session.
Selecting & Evaluating Sources	The range of sources available are varied, this session teaches students to alter search items to find resources, to be able to scan and survey to quickly decide the relevance of sources and evaluate the reliability of sources of information based on timeliness, author, purpose, and proximity.
Referencing & Avoiding Plagiarism	A key session for students to understand the importance of referencing when completing academic work. Students will be able to evaluate when it is necessary to include references and be able to write references and insert appropriately making use of online tools where available.

Liberal Arts & Design

Title	Content
Independent Learning	Students will be able to identify their learning style, explain the importance of effective note taking and tools which can be utilised and the benefits of good time management skills.
Creating your Portfolio	Many students applying for a creative course – such as design, architecture, or creative arts – will be required to complete a portfolio to showcase their skills. This workshop will help students: create a coherent structure, decide the range of pieces they will include and practice explaining their creative process and potential.
Attention to detail	Understanding the importance of attention to detail and ways to improve this core skill.
